Input voltage:	220V
Output voltage	220V

## APPLICATION

The connect duo models can be controlled via the Seliger smart app.

The model connect duo can only be used and controlled in conjunction with the app. The use of the connect multi is described below:

1. Plug the connect duo into the socket.
  - The pilot lamp on the connect duo connect component lights up red.

### Downloading the app

The Seliger smart app can be downloaded via the website [www.seliger.eu](http://www.seliger.eu) or via the QR code specified in chapter 6.2.

Proceed as follows to use the Seliger smart app in conjunction with the connect duo:

1. Activate Bluetooth on your mobile phone and share your location.
2. Start the Seliger smart app.
  - Agree to the data protection ordinance.

3. Please create an account if you are downloading the Seliger smart app for the first time. Please log in if you already have an account.

4. Enter your e-mail address. You will receive a confirmation code via e-mail.
5. Enter the confirmation code within 60 seconds.

You can now use the Seliger smart app.

## Establishing a connection:

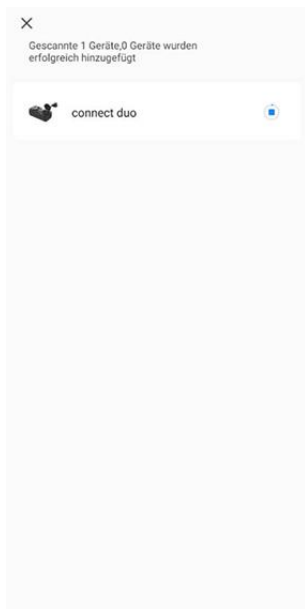

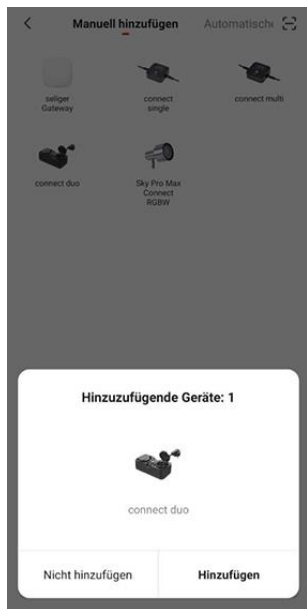

1. Press the button on the connect component for 5 seconds.
  - The pilot lamp blinks for 3 minutes red.
2. Establish the connection via the Seliger smart app.
  - If no connection has been established with the device after 3 minutes, please press the button on the connect component again.

## Integrating the connect duo into the Seliger smart app

1. Open the Seliger smart app and click on the pushbutton  in the top right corner.
  - The connect duo is recognised automatically.

2. Please follow the instructions on the screen to add the connect duo.
- If the connect duo is not recognised after 10 seconds, follow step 3.

3. After you have pressed the pushbutton , select the pushbutton "Automatic scan".

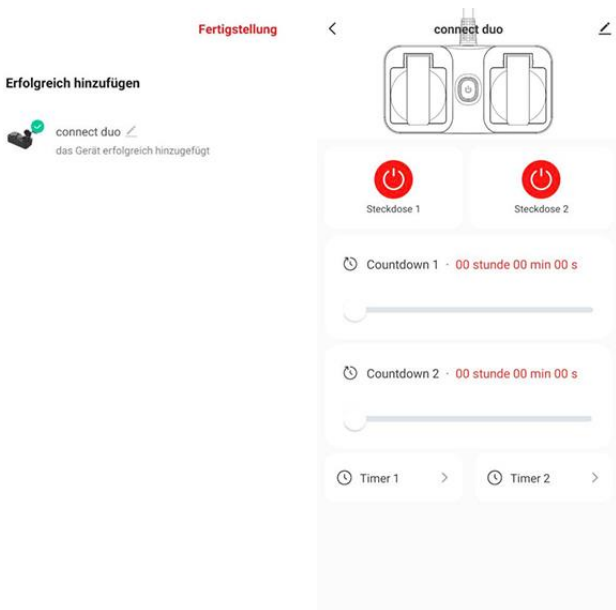

4. Click on Continue.

5. Wait until the connection has been established. As an option, you can assign the connect duo its own name via the  symbol, then click on Continue.

6. In the overview, click on Complete to finish integrating the connect duo.
- As soon as the connect duo has been successfully added, you will find it on the start page.

If the connection has not been successful, reset the device and try again.

## Resetting the device:

1. If the connect duo had already been connected, remove it from the app.
2. Hold the reset button on the connect component depressed for 5 seconds.
